DESIGN

Web design is a Web development process for creating a website that focuses on aesthetic factors like layout, user interface and other visual imagery in order to make the website more visually appealing and easy to use.

UI - UX

User interface (UI) and user experience (UX) are two words that you might hear mentioned frequently in tech circles (and sometimes interchangeably).

But what do the terms actually mean, and what does it mean to be a UX or UI designer?

HOST

Web hosting is the activity of providing storage space for a website that is connected to the Internet.

When you have a company that has space on servers and people buy space to store their websites so they can appear on the Internet, this is an example of web hosting.

DEVELOPMENT

Web development refers in general to the tasks associated with developing websites for hosting via intranet.

The web development process includes web design, web content development, client-side/server-side scripting and network security configuration, among other tasks.

SEO

SEO stands for search engine optimization, which is a set of practices designed to improve the appearance and positioning of web pages in organic search results.

Because organic search is the most prominent way for people to discover and access online content, a good SEO strategy is essential for improving the quality and quantity of traffic to your website.
